Re: Demonstration of capability by means of alternative procedures to DOA - Invoice

Dear Mr. Lo Presti,

The Commission Regulation 488/2005 on fees and charges entered into force on June 1st, 2005. For activities related to demonstration of capability of design organisations that are ongoing on June 1st, 2005, its article 13 requires fees to be levied by the Agency so as to avoid double payment by the applicant.

Consequently, for organisations for which the application has been filed prior to June 1st which and are still on-going, only hours spent after 1 June are invoiced by EASA.

The activities related to alternative procedures to DOA are charged on an hourly basis at a rate of 99 €.

You will find, attached, the details of the invoice, which includes the number of hours spent after 1 June 2005 by EASA.

This invoice is payable in exchange of the EASA finding of compliance with alternative procedures to DOA.

Yours sincerely,

Wilfried SCHULZE
Head of Organisations Department
